

Pumpkin Apple Prints

Make your own mini pumpkin faces by using an apple, some paint and your imagination!

You will need:

- An apple
- Orange paint
- White paper
- A black pen
- A knife and a grown up to help with cutting

1 Ask a grown up to carefully cut an apple into two pieces.

2 The apple should be cut from the top downwards, to form a mini pumpkin shape.

3 Paint the apple with thick orange paint.

4 Have fun making lots of prints with your apple!

5 Once the paint is dry, you can add your own creepy pumpkin faces! You could cut out your pumpkins and display them in your window, or string them together to make a Halloween garland!
